

Technical Data Sheet

NIPACIDE CI 15 MV

CLARIANT CHEMICALS (CHINA) LTD
NO.2 LANE 168 LINHONG
ROAD,CHANGNING DISTRIC , SHANGHAI
www.ics.clariant.com
www.clariant.com

Biocide for the painting coating and polymers and printing ink and adhesive and pigment

Composition	Chlor-methyl and methyl isothiazolinone. Monovalent salts
--------------------	--

Product properties ¹

Appearance (20°C)	Liquid
Colour	Light yellow
Melting point	not available
Active	1%-2.5%
Boiling point	≥100°C
Density at 20°C	1.01-1.04 g/cm ³
pH	2-4
Viscosity dynamic	20mPa.s (20°C)

Profile

Nipacide CI15 MV is water based, low toxicity biocide developed for the complete in-can protection of water based products. Nipacide CI15 MV is effective against a wide range of microorganisms including gram positive and gram negative bacteria, yeast and fungi. Microorganisms grow at a rapid rate and without use of the correct biocide, numbers can increase dramatically.

Application

Nipacide CI15 MV is recommended for preservation of a wide range of applications including water based /Latex/PVA adhesives, PVA / Acrylic polymer emulsions, water based decorative paints, printing inks, metal working fluids and construction admixtures. Nipacide CI15 MV is effective against a wide range of common spoilage organisms. Thermal and pH stability

¹ These characteristics are for guidance only and not to be taken as product specifications. The tolerances are given in the product specification sheet. For further product properties, specifications, safety and ecological data, please refer to the MSDS.

for Nipacide CI15 MV is a critical consideration and it should not be use for products with pH >8.5 or production temperatures of >40 C.

Use level

Nipacide CI15 MV should be evaluated in finished products at levels between 0.1% and 0.3%. Please note, however, that the use of Nipacide CI15 MV above 0.1% requires R43 (causes sensitization by skin contact) hazard labeling. If labeling is an issue it is recommended you consider an alternative Clariant biocide, either CMIT/MIT free or a CMIT/MIT combination biocide eg Nipacide CFX 4 or Nipacide IB

Chemical compatibility

Nipacide CI15 MV is compatible with most raw materials used in manufacture of industrial products, Nipacide CI15 MV compatibility should always be checked and evaluated before use.

Clariant Technical Service

Clariant technical service is available to assist customers in the determination of the optimum use level of biocide required to fully protect their product. A dedicated team of microbiologists are on hand at all times to assist customers with technical enquiries relating to product protection. Full microbiological efficacy testing is available.

Safety

Please see Material Safety Data Sheet before handling the material.

This information corresponds to the present state of our knowledge and is intended as a general description of our products and their possible applications. Clariant makes no warranties, express or implied, as to the information's accuracy, adequacy, sufficiency or freedom from defect and assumes no liability in connection with any use of this information.
